THE MUELLER REPORT LEAKED! Here's What We Know

WASHINGTON D.C. -

The Mueller Report was finished up on Friday, March 22nd, and so far, the Justice Department has done a surprisingly good job of keeping its contents under wraps. Attorney General and stock photo of a white businessman William Barr has sent a short summary of the report to Congress, informing them that the report exonerated the president on charges of collusion but not on obstruction of justice charges. Barr's 4-page summary raised some eyebrows, since Mueller's report was reportedly nearly 400 pages long. Luckily for us, and for you, our dear readers, the full report has been made available to us by an anonymous former WashU student now working for the Justice Department.

Here's what Attorney General Barr left out:

1. Melania Trump's anti-cyberbullying campaign was started entirely to make sure her name no longer auto-corrects to "Melanoma"

Eric and Don Jr. prepare to dump dirt on Hillary Clinton.

2. Even more Anthony Weiner dick pics
3. 30 pages of improvements to Mueller's Galaga high scores
4. Anthony Scaramucci's parking pass (he was fired before he could pick it up)
5. Donald Trump Jr. and Eric Trump's infamous Trump Tower meeting with Russian operatives failed because they thought they

- were getting literal, actual dirt that they could then dump on Hillary Clinton using a backhoe and a fake Oval Office
6. Photo evidence of the condom Mike Pence uses (he washes it afterwards, don't worry)
7. What actually happened in Benghazi: surprise birthday party gone wrong
8. Barack Obama's birth certificate

WashU Announces Innovative Plan to Increase Economic Diversity

CLAYTON, MO-

No one can deny WashU's strengths as an academic institution. Boasting some of the best faculty in the world and vibrant extracurriculars the university is frequently ranked among the most elite in the nation. There is, however, one category in which WashU has nearly always ranked

very close to last: socioeconomic diversity.

A now-infamous 2017 study by the New York Times found that WashU managed to top the list of least socioeconomic universities in the United States. The report prompted outcry from the student body and surrounding, including numerous

hard-hitting StudLife op-eds and local news coverage, but little progress has been made in the intervening years.

But no longer will public cries for change go unheard because last weekend, the Washington University administration announced a bold, far-reaching new plan to increase socioeconomic diversity among future classes: admit more billionaires.

This unprecedented move to include more of the nation's uber-rich brats in WashU's student populace was prompted by the recent college admissions scandal in which parents paid hundreds of thousands of dollars in order to ensure their offspring's acceptance into their top-choice universities.

"If there's anything that this scandal has shown the university, it is that we have left the talent and tuition money of an entire demographic largely untapped for far too long," wrote Chancellor-Elect Andrew Martin, who has been the driving force behind the change, in a university-wide announcement email.

Bradley and Chase Koch were recently admitted to the Class of 2023. Both plan to attend Washington University after Yale rescinded their admissions as a part of the college admissions scandal.

St. Louis Style Modifications

Surprised by St. Louis style bagels? Here's some other 'St. Louis style' modifications you haven't heard of:

1. St. Louis style beach vacation

No coastline? No problem! The banks of the Mississippi offer the same waterfront fun without any of the hassle of sand, nice weather, non toxic water, or happiness.

2. St. Louis style college students

If you're looking for someone with the entitlement and pretension of an Ivy League student, but with marginally less academic prestige, look no further! The St. Louis style college student comes with a full serving of stress culture and a hefty lack of appreciation or awareness of their surroundings. We're so self-centered, we conflated "St. Louis college students" with "WashU students" because we don't give a single flying fuck about SLU, UMSL, or Fontbonne!

3. St. Louis style police

*Our editors made us cut this one. Too controversial for our tastes, but be sure to check out our Top Ten Worst Genocides to Enter as a Straight White Male!

4. St Louis style tinder

If you've been swiping in another city and searching for a Mr. Right that once caught a really big fish, then look no further! St. Louis has got you covered. These men got big fish! And that's not the only big thing they're willing to send pictures of. ;) They also gotta a preeeeetty big rifle.

5. St. Louis style seance

Like your average seance except someone's mom baked a tray of gooey butter cake and you tried to call your dead aunt, but you couldn't reach her over the musical stylings of the ghost of Chuck Berry.

6. St. Louis Style Panera Bread

They may call it Bread Co, but that broccoli cheddar bread bowl is guaranteed to give you equal levels of indigestion!

New Study Finds Kids with Fairy God Parents Still Total Fucking Losers

BALTIMORE, MD-

Researchers at Johns Hopkins published results of a two-year study on Monday concluding that kids with fairy god parents are still "complete fucking dweebs." The study, which highlights data collected from state-wide surveys, announced "the arbitrary reception of magical companions does not counteract defects in chill factor." Those involved in the report considered several key factors, ranging from income to social media usage, ultimately finding that the "secret" nature of the meta-fictional guardians provides no advantage in social capital.

Local bullies expressed a lack of shock at the findings. "If I don't know you can summon a dragon, or date a model, why would I stop telling you to kill yourself?" Added local jock Brett Tannenbaum. "They're also literally hanging with fairies. As a bully you know how easy that one is?"

Although fairy god children are exposed to moral compasses previously unchecked by absentee parents,

Maybe instead of a having a pet dragon he could just play basketball or something.

researchers fear these lessons prevent self-development. Consistent guidance against cheating and controlling the weather denies subjects the chance to discover cool shit like vaping and Pornhub. "When you don't explore dope stuff you can't integrate yourself," notes child psychologist Mira Synger, taking a fat rip from her Juul.

Op-Ed: Boycott Taylor Swift

CLAYTON, MO-

It's hard to avoid megastar Taylor Swift. With six full-length albums, ten Grammy awards, and millions of fans worldwide, there is no doubt that "T-Swift" is a household name. Whether you love her or hate her, you know who she is and what she does. But is there more to this pop sensation than meets the eye?

Although her earlier music videos typically portray Swift in delicate white dresses, often accompanied by an acoustic guitar and a sunlit field, her recent works have taken a much more sinister tone. For example, the music video for her comeback single "Look What You Made Me Do" is positively bursting with Satanic imagery, from snakes (the devil's reptile) to zombies (the devil's dead people) to men (the devil's gender). Meanwhile, "22", when multiplied by three, is equal to 66, which is only one six away from "666".

It's obvious, isn't it? I mean, wake up, sheeple: Taylor Swift is the antichrist.

As such, Swift has the power--nay, the obligation--to bring forth the apocalypse that will end the world and cast us all into the sweet, sweet void of endless torment. And yet, what has she done? Has she brought down the rains of hellfire that will cleanse the planet

of this prison that we call life? No. Instead of doing her goddamn job and sending everyone down a one-way waterslide to hell, she has wasted her time pumping out catchy pop anthems and dating way hotter men than I do.

That's why I'm calling for a complete boycott of Taylor Swift and Taylor Swift-adjacent music and merchandise. We demand that Swift opens the seven seals, initiating the Armageddon that will eventually free us all from our mortal forms. No matter how relatable her lyrics may seem to be to our most recent heartbreaks, it's time to stop allowing our affinity for easily memorable choruses blind our judgement. It's time to cease our complicity in Swift's unrelenting refusal to end it all. It's time to take a stand for humanity.

WUnger Games 2019: Recapping the Madness

With the 2019 WUnger Games March Madness Tournament finally meeting an exciting conclusion, WUunderground is ready to review some of the highlights and storylines from this year's postseason. Although 32 student groups entered the tournament-style fight to the death, only one emerged as the victor:

Beekeeping Club Takes the Title.

No one outside of the WU Beekeepers hive-mind could've seen this coming. "It was obvious to us that we were championship contenders," said Vince Johnson, president of the club, which was the 13th seed in its conference, "but we knew we had doubters throughout the school." The Beekeepers had to run the gauntlet to earn their finals appearance; they needed to defeat top-seeded groups WUHHU (4), Ashoka (5), and LARP (1) on the road. The grueling path paid off, and after defeating WUChurn (10) in the Eastern Conference Finals, they were able to seal the championship versus their fellow underdogs and Western Conference Champions...

The Anime Exploration Team.

Though the two most heavily-armed and intimidating student groups - Phi Delt and LARP - earned their respective #1 seeds through their notoriety and violent reputations, both were upset by the eventual first- and second-place finishers, with the Anime Exploration Team (16) shocking the student body by dispatching Phi Delt in the first round. This was the most stunning result of the entire tournament, according to WUSPN analyst Diana Williams. "Not only was it the first time in the tournament's history that the #1 seed lost in the first round, but it was also a complete blowout." Indeed, the highly-ranked Phi Deltas were routed by the Anime Exploration Team, who credited their dramatic opening salvo to "pent up rage" from "years of being made fun of and called 'weebs'."

In terms of Cinderella stories, this was a tournament for the ages.

In addition to the Beekeeping Club and Anime Exploration Team's laudable postseason runs, WUChurn and the Debate Team (14) were able to outperform their projected performance as well. Though many expected the Fencing team to defeat Debate Team by a significant margin in the first round, they weren't ready for Debate Team's unorthodox strategy of literally arguing teams to death. "We knew we'd have to turn it up a notch for the postseason," said Kevin Bates of the Debate Team, "but we had faith in our gameplan, so it was just a matter of execution."
